

Technical Data Sheet

Product: DT053

THE EDGE
ON SAFETY

DESCRIPTION

Anodised aluminium detail trim, designed for use to cover the expansion gap between the floor and walls, carpet, sliding doors and entrance mats. This profile is available in natural satin, bronze and champagne. Suitable for 12mm-14mm floor coverings. This profile is designed for interior and exterior use.

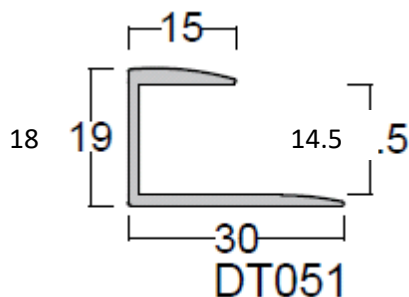

MATERIAL

T6 6063 Alloy aluminium. Available in Natural Satin, Champagne or Bronze.

Standard 2.5 Metre Lengths.

DIMENSIONS

EXAMPLE

In this example, DT051 has been used with a wooden floor covering. The profile allows for a clean finish between sliding door and flooring and covers the expansion gap between surfaces.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
