

Technical Data Sheet

Product: DT067

THE EDGE
ON SAFETY

DESCRIPTION

This profile is designed for use as a carpet/vinyl to bare floor transition. This profile is designed for use with LVT and suitable for 3mm floor coverings. This profile is precut to allow for curving, this is the curved profile for DT065.

MATERIAL

T6 6063 Alloy aluminium - Natural Satin anodised.

Standard 2.5 Meter Lengths.

DIMENSIONS

EXAMPLE

In this example the difference between DT065 and DT067 can be clearly seen. DT067 is fabricated slightly differently to allow the trim to be contoured on site to match a contoured floor within its specification details.

For PDF and CAD drawings with full dimensions and installation guides, please refer to our website www.tredsafe.co.nz

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
